LYNNWOOD, WA — Olympus® Lock, Inc. is pleased to announce that US Patent No. 7,716,958 has been issued for our 820SC Series cam lock. The patent covers our unique 2-part cam lock body allowing easy access to the internal key-in-knob-style cylinder. Our patent provide for easy rekeying or installation of third party Schlage-compatible KIK cylinders. The 820SC ships standard with our Schlage “C” keyway compatible solid brass cylinder or less cylinder to accept other manufacturers Schlage-compatible key-in-knob cylinders.

The 820SC is available with key-retaining or non key-retaining functions, and includes the ability to lock left, right, up or down. The same cams and shifters that work with our 720LM/DM and 920LM/DM cam locks also work with the 820SC Series lock. This product includes, standard in the package, our anti-rotation plate for a more secure installation in particleboard.

Olympus Lock is a manufacturer of easily rekeyable, pin tumbler cabinet locks and interchangeable core cabinet lock bodies for a broad range of commercial applications. Our mission is to create pin tumbler cabinet locks and accessories of unparalleled innovation, quality, keyway compatibility, and value in a manner which sets a new industry standard for excellence. Olympus Lock—we make the changes that change the industry. For more information contact us toll free at 800-525-0954 or visit our website at www.olympus-lock.com
