LYNNWOOD, WA — Olympus® Lock, Inc. announces the addition of a new product to its line of BEST compatible products—the new Olympus B7 Series cam lock. This lock is a non-interchangeable core product and retrofits the BEST 5E Series  $\frac{3}{4}$ " utility cam lock. It will initially be available in a 7-pin A, E or G keyway. Other keyways may be produced depending upon demand. The locks are stocked 0-bitted and each ships with 2 key blanks, anti-rotation plate, one straight cam and one reversible bent cam that can be installed in the in-bent or out-bent position. The B7 Series locks are drilled for 7 pins and work with standard .108 diameter SFIC pins. We can custom key your locks to a 5-pin, 6-pin or 7-pin system depending on your specific needs. Installation requires a  $\frac{3}{4}$ " diameter hole or double-D cutout.

The patented features you've come to know on our DCN and DCR Series cam locks are also included on our new B7 Series: working top slide and plug retaining staple for easy rekeying. This is a great product if you are looking for a less expensive alternative to the BEST original 5E series and allows you to key your cabinets into your SFIC door system without the expense of a lock and core. With the B7 Series, Olympus Lock has provided a value priced product with superior functionality.

Olympus Lock is a manufacturer of easily rekeyable, pin tumbler cabinet locks and interchangeable core cabinet lock bodies for a broad range of commercial applications. Our mission is to create pin tumbler cabinet locks and accessories of unparalleled innovation, quality, keyway compatibility, and value in a manner which sets a new industry standard for excellence. Olympus Lock—*Continuing to make the changes that change the industry.* For more information contact us toll free at 800-525-0954 or visit our website at [www.olympus-lock.com](http://www.olympus-lock.com).
