OLYMPUS LOCK HOSTS NORTHWEST LOCKSMITHS ASSOCIATION MEETING

NWLA

On October 17, the Northwest Locksmith's Association held their monthly meeting at Olympus Lock's training facility. We had 27 locksmiths in attendance. Last month, Olympus also hosted the first ILA (Institutional Locksmiths Association) meeting for the pacific northwest.

Notable Projects

Suvarnabhumi International Airport Bangkok, Thailand.

The brand new Suvarnabhumi International Airport in Bangkok, Thailand officially opened for business on September 28, 2006. This project used over 1,000 of our 777 Schlage large format IC core cabinet locks. The new airport, an airy and futuristic structure designed by German architect Helmut Jahn, features an oval-shaped concourse, energy-efficient temperature control systems, and several superlatives in airport construction.

Thai authorities boast it has the world's largest terminal building under one continuous roof at more than 138 acres. The 433 foot control tower is the world's tallest. Overall, the airport covers 132 sq km, (20,000 rai, 8,000 acres).

The new airport can handle the Airbus A-380, the world's biggest commercial plane, on its two 2.5-mile runways, although the plane itself is not yet even certified for commercial flights.

More than 800 flights carrying 120,000 passengers were to pass through the airport on its first day.

Roosevelt High School Seattle, Washington

Official opening was September for the 2006-2007 school year. This project used over 1,200 pieces of our 700 / 800 series cabinet locks in a 10B finish matched with our 102-015-96 wire pull also in 10B finish.

This is a top-of-the-line school and was recently featured in a *Seattle Times* newspaper article.

Internal Spacers / Literature

For 100/200, 500/600 and N078/R078 Locks

WP21
3/32" thick

WP22
1/4" thick

WP23
1/2" thick

For 700/800, 721, 754/854, 777/888, L7080 and 850/950 Locks

10-350
1/8" thick

10-351
1/8" thick for L7080 locks

Internal Spacers

Use our internal white plastic spacers to flush fit the face of the cabinet lock with the face of the cabinet material. We offer spacers for our most popular 7/8" and 1-1/8" diameter cabinet locks. Spacers can be stacked to create your required thickness.
